

DIAMOND PAINTED GLASS RANGE

For technical reasons to do with colour reproduction and paint manufacture, the samples in the fan book may not exactly match the paint colours. Colour may also vary by batch in production.

PAINTED GLASS

DIAMOND PAINTED GLASS

DIAMOND PAINTED GLASS

The versatility and maintenance-free qualities of glass have led to a huge increase in its popularity as a material of choice for interior design, whether clear for sub-division of building spaces or painted for cladding of wall surfaces - or combination of both.

Diamond Glass can now produce a full range of painted glass, mixed in house to almost any colour and applied to a wide selection of glass products to match any requirement - be it safety, security, fire proof, sound control or combination of these.

We can machine in house on, CNC machinery, cut-outs, holes, or notches, with various edge finishes, on glass from 4mm through to 19mm. It can then be thermally toughened and / or heat soaked. After painting we can also laminate using PVB to produce products for the most demanding locations and standards including walk on glazing and stair treads.

We regularly supply painted glass for use in kitchen splash backs and bathroom walls along with heavier 19mm glass as work-tops machined to customers' requirements.

We also stock low iron glass in various thickness. With its crystal clear purity it emits the true colour of the painted glass surface.

All of the above are made to measure, painted in any RAL or Dulux trade colour. We can produce the most contemporary design or finish with the following advantages:

BENEFITS OF PAINTED GLASS

- Sleek modern look
- Virtually maintenance free
- Huge array of colours
- No mouldy grout or unsightly cracked tiles
- Easy clean - just wipe with cloth
- Tested to strictest EU standards, EN12150 &EN12600.

All our painted glass is produced in our modern production facility.

Please contact us for further information on this product and see if we can help produce your next exciting design with made to measure service.
